Dear Parents,

It was another exciting weekend with plenty of football, filled with grit, determination and excellent skills. Thank you for the over whelming support to ensure the success of our first Asia Now Junior Indoor League.

However, to further improve on the development of each child; we need your support on these pertinent issues listed below.

1. If your child is playing, allow him to express himself with his own decision making. Never tell him what to do? Rather ask him what he can do when he has the ball or when he does not have the ball.
2. Allow the coach to work to help your child. We must remember that we are developing and not focusing on the results. You will agree after three rounds of matches there has been drastic improvement from each child playing the game.
3. We understand if your child is sick, otherwise his attendance is important to the team, reason being your child has already had an understanding with his team mates by playing together. Secondly, the team your child plays may not have sufficient players to make the numbers playing the game. In this aspect we hope you will understand our predicament and ensure your child's presence for every game.
4. If you as a parent have any grievances, with regards to your child's performance or even with the coach please do not hesitate to contact us directly. We assure you, prompt action will be taken to rectify your displeasure.

We wish to see the remarkable progress made by your child continue to excel.
Collectively, WE WILL DO IT.

Thank you.

Kunju Jamaludeen
Technical Director

REMEMBER THE GAME IS THE BEST TEACHER.
